Exploring a HexaHexaFlexagon

Move from face to face on your hexahexaflexagon. There are many faces, some the same colour. Different faces are identified by the numbers in the centre. Draw a digraph of your findings below, noting the face number, and the letter you pinch to reveal another face. Keep track of your explorations by completing the table as you progress. This lets you check you've tried every possibility.

| betting the table as you progress. This lets you check you ve thed every possibility. | | | | |
